**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Regarding claims 1 and 8, applicant states "energizing and resultant excitation of the plurality of phases". Examiner does not understand how a phase can be energized and excited. It's unclear that how a "rotating body can follow change energize phases" and "when final energization is done". Examiner suggests that the applicant uses a more concise and direct description of the invention rather than using clauses to describe embodiments. Examiner also has difficulty understand the claims due to excessive usage of the prepositional phrases. For the above reasons, the 35 U.S.C 112 rejection is deemed proper. Since the scope of the invention is not clear, the claims are not examined on the merits.
